

Phase 3: Test with New Hint Word

Now we'd like to test your memory for the response words in a slightly different way.

Instead of the original Hint word, we will give you a new associated Hint word, along with the first letter of a particular Response word that is related to that hint.

For instance, you might be presented with NIGHT-- E____. Although you didn't see "NIGHT" at all before, you did see a Response word that is related to "NIGHT" and that begins with the letter 'E' - namely, "EVENING". Try to think of the Response word that you saw before **that is related to this new Hint and that begins with the letter provided.**

Example: In phase 1 you learned the below pair

ROBE EVENING

Try to recall the response word that is related to the new hint word (e.g. "Night") and starts with the provided letter (e.g. "E").

NIGHT- - E

Type in the Response Word
