

Example Red Hint Trial

The diagram illustrates a trial sequence. It begins with a box containing a plus sign (+). This is followed by a box containing the word "ROBE" in red text. Above this box is a silhouette of a head with a brain, and a thought bubble containing a red "X", indicating that the word "ROBE" is incorrect. The sequence continues with another box containing a plus sign (+). This is followed by a noisy image of the word "BIR". To the right of the noisy image is a box containing the text "Type the word you identified:" and a smaller box containing the text "Bi".

If asked to... type the word you identified

Type the word you identified:

Bi
